ABOUT ME

I am a Frontend Developer with a robust computer science background. My commitment lies in delivering high-quality code as I take charge of end-to-end project development, from scalable architectures to responsive dashboards. Expertise includes backend development, problem-solving, and a deep understanding of business logic.

EXPERIENCE

Front-End Developer

Intelifox   Mai 2024 - Present

- **Ila26 | France - Remote:**
  Project Overview :

Ila26 ERP: A sophisticated ERP system designed to enhance productivity and engagement within the workplace. The platform provides a connected workspace with streamlined communication and collaboration tools, ensuring efficient coordination among employees. It features intelligent centralization, offering easy access to essential tools and information.

- Responsibilities:
  - Develop complex components and features using React, RTK query, and TypeScript
  - Optimize components for maximum performance across a vast array of web-capable devices and browsers.
  - Diagnose and troubleshoot advanced issues in the application.
  - Write clean, efficient, and maintainable code using React and TypeScript.
  - Take ownership of medium to large tasks and deliver them within set deadlines.
    .

Technologies used:

Typescript, React Js, Redux, RTK query, Material UI, Tailwind CSS, recharts, CASL.

Front-End Developer

WeDort | Wien, Austria – Remote   Nov 2023 - Mai 2024

- **Wedort:**
  Project Overview:

The Wedort platform stands as a revolutionary transportation solution, seamlessly bridging the gap between companies, drivers, and customers. Through intuitive dashboards and mobile applications.

- Responsibilities:

- Architecting and implementing solutions, developing various front-end screens using React JS with TypeScript.
- Utilized Notion for tracking the implementation of user stories and defect resolution.
- Implemented React Query within the application to efficiently fetch and manage data from the Back-End.
- Broke down project tasks into actionable items and assigned them to team members.
- Conducted code reviews to ensure code quality, consistency, and adherence to coding standards.
- Engineered a scalable project architecture, prioritizing security and scalability with permissions and role-based guards.
- Mentor junior developers and help them with code reviews and guidance.

EDUCATION

Bachelor of computer science

Ziane Achour University of Djelfa   Sep 2015 – Jun 2018

- **Project** : Educational management system for IT science department useing
  Technologies used: C#, WinForms, SQL Server

Master degree in Networks and distributed systems

Ziane Achour University of Djelfa   Sep 2018 – Jun 2020

- **Thesis**: Study and simulate the BGP external routing protocol

SKILLS

Javascript, Typescript, ReactJs, NextJs, ExpressJs, graphql, Redux, RTK query, React query, React table,

HTML 5, CSS3, Styled-Components, Material-UI, Tailwind CSS, Bootstrap.

MongoDB, Firebase.

Git, Github

Clickup, Jira, Notion.
